

## **Concurrent Enrollment at La Salle**

*La Salle is extremely proud of our partnership with four universities as we seek to continually enhance our college preparatory offerings. Our instructors have worked closely with these various universities to become approved instructors in order for us to offer these academically rigorous courses. Students who complete these courses significantly improve their transcript for college application through the rigor demonstrated in their course of studies. Additionally, the college credit earned allows our students to save money in college and advance in the college course selection process among their college freshmen peers.*

### **UW in the High School**

La Salle will continue to offer select University of Washington classes on campus in the 2021-2022 school year. This continues a long-standing partnership with UW at La Salle. Students will have the option of taking these classes for normal high school credit or electing to take them for dual UW and La Salle credit. The curriculum for these courses is college level and given to us directly from the University of Washington. Those students successfully completing these courses will establish a UW Transcript. There is a separate fee for those wishing to take the course for UW credit.

### **Grand Canyon University**

In addition to UW in the High School, La Salle will continue offering juniors and seniors with a cumulative GPA above 3.0 the opportunity to earn college credit while still enrolled at La Salle. Courses are available online, are 7-weeks long, and cost approximately \$300 (\$210/course plus books) for 4 credits. La Salle's students can take up to 6 GCU courses (**24 college credits!**) while still high school. More information can be found under the Academics tab on the La Salle website. (See "Grand Canyon University Dual Enrollment")

### **Central Washington University**

CWU *Physics* is a one-year algebra-based (non-calculus) lecture and laboratory problem-solving course that explores the physical world and the natural laws that govern it. This is an elective science course usually for seniors that examines the phenomena of motion, electricity, light, heat and sound where matter, forces, energy and magnetism collide. This program allows students to earn 5 units of college credit per semester, while completing the course at La Salle. There is a separate fee for those wishing to take the course for CWU credit.

### **Eastern Washington University**

EWU *AMERICAN HISTORY SINCE 1877* is offered as alternative to US History. A course in US History is required for graduation. EWU *The Western Heritage* is an elective course offered in the Social Studies Department. Pre-requisite: B or higher in World History or teacher approval. There is a separate fee for those wishing to take the course for EWU credit.
